ECOMMERCE AUTOMATED BAGGING MACHINES

THE COMPLETE SOLUTION

WE ARE YPS.

WORLD LEADING AUTOMATED BAGGERS FOR ECOMMERCE & INDUSTRIAL APPLICATIONS.

Satisfyingly streamlined, our versatile bagging machine solutions boast precision-perfect bagging and labelling capabilities for a wide range of applications. From industrial distribution centres to e-commerce packing stations, our bagging machines are designed to suit any speed and fulfilment requirements.

Among our range of industrial bagging machine systems is the Sharp Max Pro 24™, officially the **widest bagging unit available** on the market, while our horizontal machines pair Hugo Beck's **top-speed bagging** with Vulcan's **super-smart labelling** systems.

Combined with our flexible material choices, our impressive bagging machines guarantee to maximise efficiency, accuracy, and compliance, all while reducing labour costs and futureproofing organisations.

OUR BAGGING MACHINES CAN PACK:

- | | | |
|---|---|---|
|  Apparel |  Mail Orders |  Toys & Games |
|  Printed Materials |  E-com Returns |  Electronics |
|  Hardware |  PPE |  Stationery |
|  Healthcare |  Cosmetics |  Confectionery |

VERTICAL BAGGING MACHINES

Automatic and semi-automatic bagging machines for a wide range of applications.

We've partnered with the globally-renowned manufacturer Sharp to bring to market an outstanding range of vertical bagging machines for B2C e-commerce and B2B fulfilment applications.

The range encompasses everything from entry-level models to more sophisticated machines with additional features, but all are designed to **increase packing speeds, output, efficiency and accuracy** whilst reducing costs in labour, consumables and secondary packaging.

Seamless integration with your warehouse management system enables the printing of static and variable information directly onto the pack, such as shipping labels and product details.

For larger products, ultimate flexibility or to futureproof your operation, we offer the **widest autobagger on the market** - able to bag up to two shoe boxes side by side.

The vertical bagging machines boast **direct high-definition on-bag printing** to negate secondary labels.

Paper or plastic materials can be used, dependent on the model selected, for enhanced expression of your brand values.

Key Benefits :

- Increase packing speed, output & efficiency
- Reduce costs in labour, consumables and secondary packaging
- Select the ideal machine based on cost, speed or additional features
- Integrated high-definition thermal transfer printing
- Choice of paper or plastic materials
- Included service contract

"The bagging machine was so efficient that from the moment you brought it on site to demo, I placed an order for two!"

Simon Noble, LDL Components Ltd

HORIZONTAL BAGGING MACHINES

For the accurate bagging of goods at high speed.

In conjunction with the world-leading German manufacturer Hugo Beck, for whom we are the UK exclusive distributor, we can offer a stunning range of high-tech bagging machines dedicated to e-commerce, logistics and mail order applications.

With a **focus on flexibility** in material choice between papers and films as well as exceptional track records for **speed and performance**, our horizontal bagging range is at the cutting-edge of the industry.

Precise product recognition creates a finished shipping bag that is as small as possible, **reducing material use** and **improving the pack aesthetics**.

The good looks don't end there, with the option of printed materials a popular choice to further **enhance brand recognition**.

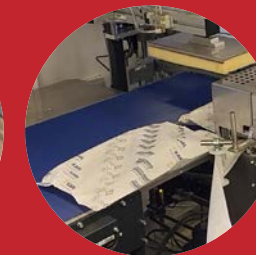

The integration of Vulcan labellers ensures the complete **security and integrity of consumer data** throughout the packaging process,

with intelligent information systems at work to ensure **GDPR compliance** and accuracy.

Plus, the connectivity to client-side ERP systems means that with Hugo Beck horizontal bagging systems, the sky is the limit for e-commerce and mail order operations.

Key Benefits :

- Flexible packing to reduce material consumption & create neat bags
- In-built print and apply labelling solutions
- Smooth changeovers between pack sizes or materials
- Data management for full GDPR compliance
- Choice of paper, plastic & printed materials
- Included service contract

"The support offered by the team at YPS has been second to none, allowing us to run at peak performance around the clock."

Karl Blackburn, totes ISOTONER (UK)

BAGGING MATERIALS

Recyclable bagging materials for enhanced aesthetics and branding.

Our versatile e-commerce bag portfolio means that you can select the perfect packaging, whatever the application. With e-commerce poly bags to PE-lined papers, our exceptional quality bagging materials are available in **a range of thicknesses, widths, and specifications** such as easy-tear perforations and hang holes.

For online businesses wanting to make an impact, our **custom printed** e-commerce bags can be tailored to your company identity for unique mailers that build a positive brand image from shop floor to front door.

All our e-commerce packaging bags are made from **100% recyclable materials** - they even include a minimum of 50% post-consumer waste **recycled content too**.

Many materials can also be repurposed as durable return bags, with the simple addition of resealable closing strips.

Both **pre-opened bags** on a reel and **fan-folded specifications** in a carton are compatible with our market-leading range of e-commerce bagging machines, so you can truly future proof your bagging process with our end-to-end e-commerce services.

Key Benefits :

- 100% recyclable bagging material options
- Available in a range of widths and thickness, plus additional features
- Custom-printed bags available in a range of up to 8 high-definition colours
- Supplied as either fan-folded or pre-opened on a reel

"From start to finish, you expertly understood our needs."

Tim Herbert, Wickes

OUR BAGGING MACHINES IN ACTION...

Who?

Totes Isotoner (UK)

Where?

📍 **Billericay, Essex**

The Problem

Totes ISOTONER (UK)'s manual pick and pack process often proved problematic during peak periods, such as the festive season when they experience a significant upturn in orders. At these times, demand would outstrip physical capacity and staff absence would threaten productivity. Equally importantly, totes were relying solely on Royal Mail's data system, which could be slow at peak times.

The Complete Solution

To measure up to totes' needs, YPS recommended our innovative Flexo 500 E-COM horizontal automatic bagging unit, manufactured by German automation specialists Hugo Beck, with an internally mounted VULCAN direct apply labeller from Clearmark. This solution is more than capable of managing all the heavy lifting of totes' busy e-commerce process, being high-speed, high volume and highly data secure.

Furthermore, it was Yorkshire Packaging's history of award-winning after-sales support that helped to really clinch the contract, over and above the outstanding technical solution that was provided.

The Benefits

totes have been delighted with the increases in efficiency and capacity their new line has afforded, reporting a daily order output five times greater than pre-install. True to promise, the machine has also reduced dependency on manual operators and patchy data systems, reduced material waste and produced snug fitting, aesthetically pleasing mailing bags.

"We've radically increased our throughput, allowing us to complete more online order despatches in a faster timeframe and pleasing more of our customers."

Karl Blackburn, totes ISOTONER (UK)

BACKUP AND SUPPORT:

- ✓ One of the largest teams of directly employed service engineers in the UK
- ✓ SafeContractor approved
- ✓ Full operator training
- ✓ One-to-one contact with your installation engineer
- ✓ All spare parts are kept in stock at YPS
- ✓ Quick response to call outs
- ✓ Convenient servicing schedules
- ✓ **Comprehensive service contracts** to ensure your machine is kept in peak condition

Your Packaging Is Our Priority

“Great customer care and service.”
